Master's Degree – Ingegneria Gestionale

Università degli Studi di Roma
110/110

Bachelor's Degree – Ingegneria Industriale

Università degli Studi di Cassino
109/110

LANGUAGES

Italiano – native

English – intermediate

PROFILE

SAP Order-to-Cash (SD) specialist with solid experience in logistics and international S/4HANA rollouts. I combine end-to-end solution design with hands-on ABAP development and strong integration skills — REST API and IDoc interfaces orchestrated through SAP PO — owning solutions from requirements and architecture through build, go-live and hypercare. A dependable team player, I collaborate closely with colleagues and stakeholders to reach shared objectives and deliver project success.

PROFESSIONAL EXPERIENCE

SAP OTC Specialist • **Technogym S.p.A.**

03/2025 – Present

- Led **5 SAP S/4HANA rollouts** for international subsidiaries (France, UAE, US, Australia, Saudi Arabia), standardizing the Order-to-Cash template.
- Delivered the **S/4HANA 2023 upgrade** and the migration from **on-premise to SAP RISE** for the OTC area, with no disruption to order fulfillment at cutover.
- Ran **GAP analysis** and delivered the corresponding **SD & MM configuration** — pricing (condition technique, procedures and custom requirement/formula routines), OTC and logistics settings.
- Built **system integrations** via REST APIs and IDoc flows (standard and fully custom, inbound/outbound) orchestrated through SAP PO — e.g. carrier shipping (FedEx Rate/Ship, incl. dangerous goods) and 3PL delivery/goods-movement IDocs (DELVRY07, MBGMCR).
- Integrated **Salesforce** into S/4HANA (inbound) via **BAPIs** orchestrated through SAP PO, mapping custom fields through **EXTENSIONIN** and injecting logic via **implicit enhancements** on the BAPIs.
- Developed **custom output management** (NAST) with custom print programs and requirement routines.
- Developed **ABAP** enhancements — user exits, BADIs, BAPIs and function modules — automating data conversions and OTC process steps.
- Migrated **open Purchase and Sales Orders** at cutover, safeguarding data integrity across the transition.
- Provided **hypercare** and daily support, resolving incidents through root-cause debugging.

SAP SD Consultant • **Avvale**

02/2022 – 03/2025

- Delivered a **greenfield SAP implementation** across the MM/QM area, from requirements analysis to go-live.
- Configured **SD/MM customizing**, pricing procedures and the condition technique to business requirements.
- Designed and maintained **interfaces with 3PL systems**.
- Streamlined **sales & pricing order-fulfillment** flows and resolved recurring order issues.
- Coordinated **SIT/UAT** test cycles with key users and drove defect resolution through to go-live.
- Trained key users and delivered ongoing post go-live support.

KEY PROJECTS

- Managed the **SAP rollout** for the US and South African branches of a leading Italian wellness company, focused on the logistics area.
- **Post go-live support:** problem-solving, query resolution, troubleshooting, root-cause analysis and corrective actions.
- **Evolutive projects** for continuous improvement and process optimization across the OTC landscape.

LOOKING FOR

- Challenging projects and assignments that broaden my skillset and contribute to the success of the organization.
